

Virginia Department of Aviation Overnight Parking for Executive Air Service

Users of our executive air service may park their vehicles in the designated passenger parking spaces in the department parking lot. Customers should not park along the curbs or in front of the buildings unless loading or unloading a vehicle.

Overnight parking must be approved by the agency director in advance of the occurrence. Users must submit a request using the DOAV Overnight Visitor Parking Pass; the pass is available in Forms and Publications. The request should be forwarded to our facilities manager for processing. If the request is approved, Part 2 of the pass form will be returned to the requestor. This must be displayed on the vehicle's dash while the vehicle is parked in the lot.

Failure to obtain approval for overnight parking, display the approved parking pass, and park in designated parking spaces could result in ticketing and/or towing at the owner's expense.

The department is not responsible for any vehicle damage that occurs while vehicles are in the department parking lot.
